

Skilled resources for project execution and ongoing support.

Labor constraints impact every area of construction businesses. Technology offers greater efficiency but requires capacity to implement and maintain. Procore's team can help make your digital transformation vision a reality while your in-house team stays focused on standard work.

We've got the tools to help.

Account Configuration

A Procore expert(s) sets up company level and project level configurations within your account based on best practices.

Data Readiness

Procore's expert(s) works with you to check that data is correct, consistent and usable to facilitate improved decision making and operational performance.

Data Entry

Ensure project data is imported into Procore correctly to get your account ready to use quicker.

Report, Template and Form Creation

Capture and synthesize the right data to provide the insights you need for tracking and decision-making.

Historical Data Transfer

Pull in project information from older jobs so it's available for internal benchmarking and analysis.

Workflow Build-Out

Execute plans for business process optimization using Procore.

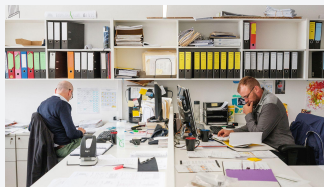

Accelerate onboarding and new initiatives

Overcome hurdles to roll out and reduce the time-to-value

Overcome project data transfer backlogs

Expand capacity to meet project goals

Keep in-house teams focused on core activities

Build in continuity and help reduce operational costs and risk.
