

Expand Advise Package

This package is designed to help you achieve a faster time to value and get you off to a strong start with your new Procore solutions. In this package, the Procore team is available to advise your Procore Committee during the implementation period, as you rollout and train your external teams and projects. All services included in this package are available for **6 weeks** after service start date.

Services Included:

Guided implementation.

You will have a named **Procore Project Manager (PM)** available to guide you through the implementation process. Through weekly calls, they will coordinate to set up consultations and assist in the configuration of your relevant product(s). This partnership will ensure your team gets fast time to value and achieves your short terms goals within the scope of your implementation package, which includes **8 hours of PM services**.

Expert product consultation.

In order to help you get the most of our your specific Procore toolset, you will have access to our team of **Strategic Product Consultants (SPC)**. Your SPC(s) will work alongside your PM to provide product best practices that have helped thousands of construction companies like yours implement Procore quickly and effectively. This package includes **6 hours of SPC services**.

Add-On Services

Services in addition to those included in this service package — such as an extension of PM support services beyond six (6) weeks, additional Consulting Services and Custom Solutions hours, or Training and Integration Services — are available upon request to ensure you have all the support needed to be successful. These services are available for a fee and are not included in this scope.

Pricing and Payment Terms

These bundled services are offered at a discount from market rates. Work performed against this services bundle will be conducted via a fixed fee and is due as defined in the order form.
